1. CUSTOMER SEGMENTATION

What is customer segmentation?

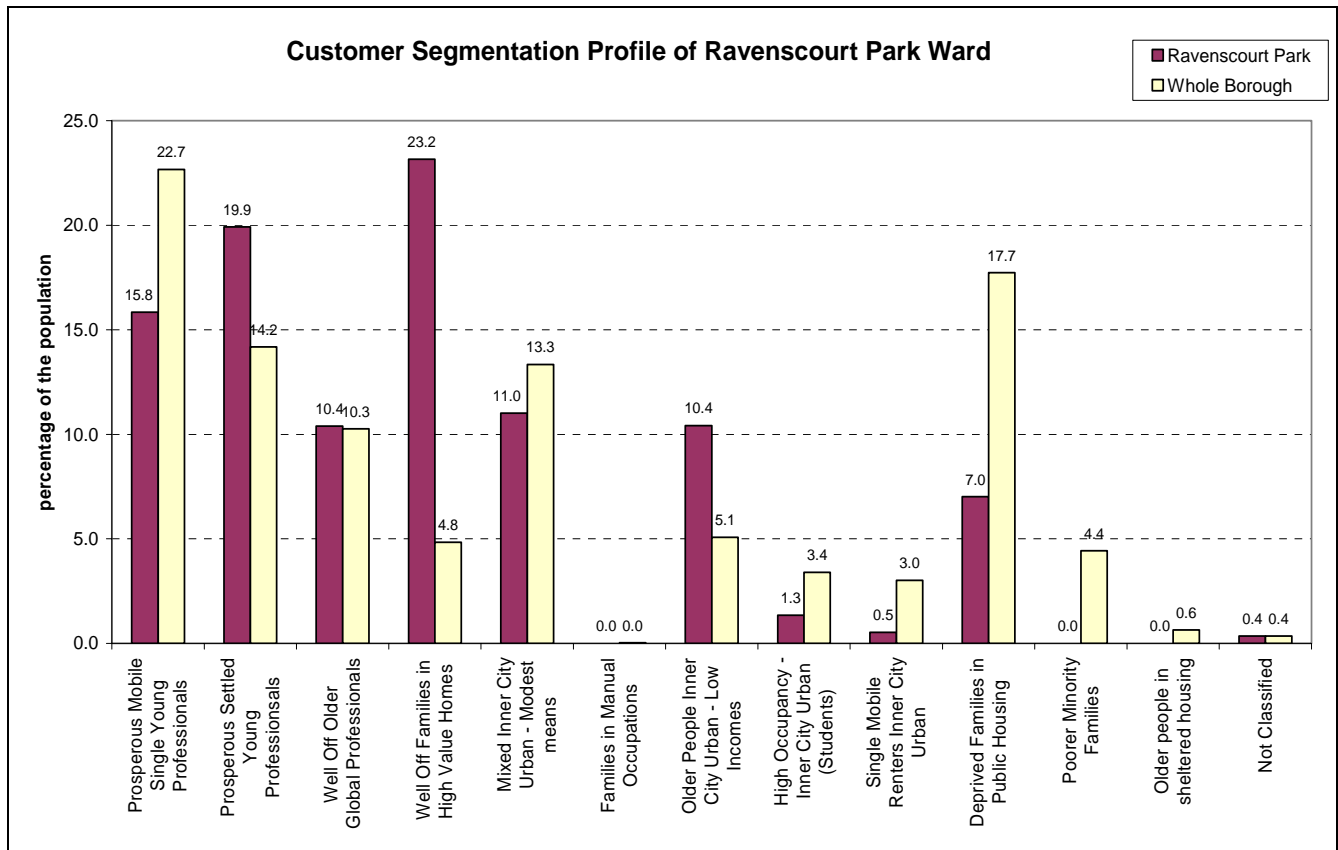

- In 2005/2006 the council undertook an exercise to help it to understand more fully the make up of the resident population of the borough.
- The exercise involved using data to classify the resident population of the borough into one of 12 groups or segments.
- The classification into segments allows assumptions to be drawn about the preferred behaviour of the segment groups, and helps the council understand where to focus its service provision to meet the needs and preferences of its residents.²
- As can be seen on the map below, the two predominant customer segmentations in Ravenscourt Park ward are: Well Off Families in High value Homes and Prosperous Settles Young Professionals.
- The chart shows the breakdown of customer segmentation in Ravenscourt Park ward in comparison to the whole borough.

5. EXPLANATORY INFORMATION AND GEOGRAPHY

Electoral Wards

- Electoral wards are the geographical administrative units used to elect local councillors and form a key part of the political geography of the borough.
- It should be noted that the population count of wards varies both between and within local authorities.
- Ward boundaries are also subject to change, and sometimes complete reclassification, by the Boundary Commission.

Borough sub-division

- The London Borough of Hammersmith and Fulham is also divided up into sub-divisions based on the three town centres of Shepherd's Bush, Hammersmith and Fulham.
- The sub-divisions represent the north (Shepherd's Bush), central (Hammersmith) and south (Fulham) of the borough.
- The sub-divisions are made up of groups of wards and split the borough into areas of approximately equal population. This aids comparison and allows differences in survey data to be analysed across the whole borough.
- The borough is sub-divided as follows:

Borough sub-division	Wards
North	Askew; College Park & Old Oak; Shepherd's Bush Green; Wormholt and White City
Central	Addison; Avonmore and Brook Green; Fulham Reach; Hammersmith Broadway; North End; Ravenscourt Park
South	Fulham Broadway; Munster; Palace Riverside; Parsons Green; Town; Sands End

Super Output Areas

- SOAs as a level of data provision were introduced by the Office for National Statistics to improve the quality and comparability of small area statistics in England and Wales.³
- SOAs are groupings of Output Areas (OAs) used in the Census. There are 111 SOAs in Hammersmith and Fulham as compared to 16 electoral wards.
- SOAs have two main advantages over electoral wards when supplying data. Firstly, SOAs are fixed in size (dependent on the level of population residing therein) and secondly, SOA boundaries will not change over time. This promotes comparability of data both geographically (throughout England and Wales) and over time.

Customer Segmentation

The twelve customer segments identified as living in Hammersmith and Fulham are as follows:

- Mixed Inner City Urban - Modest Means
- Older People Inner City Urban - Low Incomes
- High Occupancy - Inner City Urban (Students)
- Single Mobile Renters Inner City Urban
- Prosperous Mobile Single Young Professionals
- Deprived Families in Public Housing
