Exercise Background & Overview

Background Objectives Funding Possible Funding Outcomes

Introduction

•

Peopletoo it works better with you

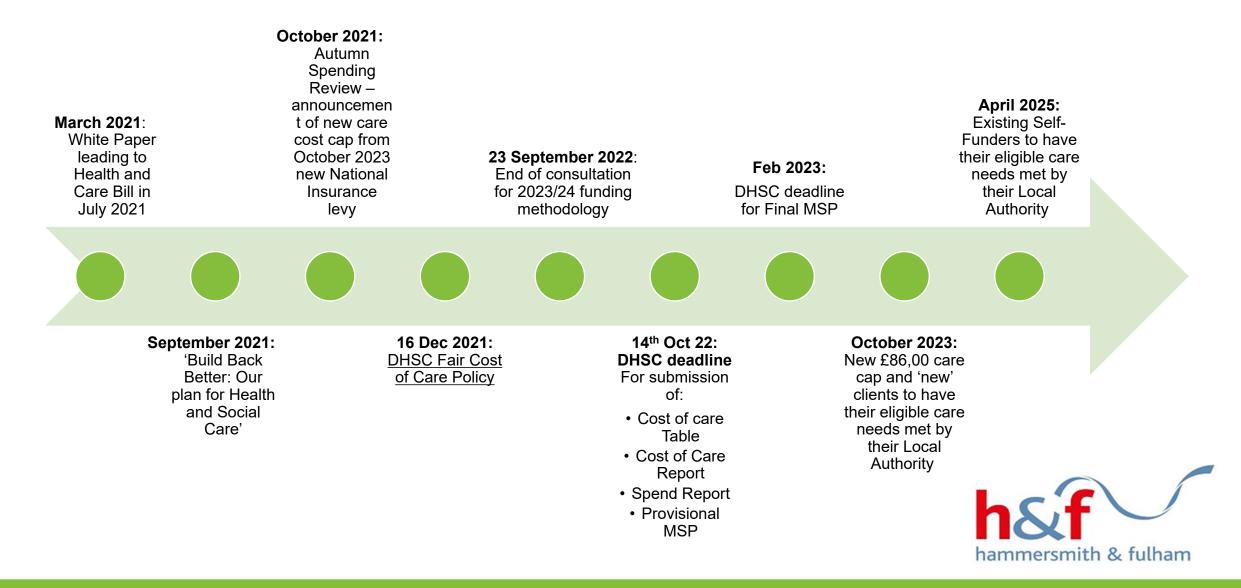

In May 2022, Peopletoo were commissioned by Hammersmith and Fulham (H&F) Council to support them to undertake and deliver a Fair Cost of Care exercise for 65+ Care Home Provision locally, in line with Department of Health and Social Care (DHSC) Guidance released in the Spring of 2022. This sets out the Government's expectations on Local Authorities (LA) in ensuring that they have the right health and care architecture in place to underpin and support the delivery of the Government's long term plan for Adult Social Care (ASC), 'People at the Heart of Care.'

- The cost of care exercise is an opportunity for LA commissioners and local care providers to work together to arrive at a shared understanding of what it costs to run quality and sustainable care provision in the local area, and that is reflective of local circumstances. It is also a vital way for commissioners and providers to work together to shape and improve the local social care sector, and identify improvements in relation to workforce, quality of care delivered, and choice available for people who draw on care.
- The objective of the work undertaken by Peopletoo was to provide the Council with reliable information submitted by the Care Home provider market via the web-based iese Fair Cost of Care Toolkit, providing detailed information on Service Providers' actual delivery costs for 2021/22 to inform a sustainable fee rate for the future as the Council moves towards implementation of the Fair Cost of Care.
- This Cost of Care report provides the Council with the detail surrounding Peopletoo's Fair Costing methodology and approach to ensuring provider engagement, the approach to validating returns submitted by providers to ensure accuracy, and clarification in relation to the approach to outliers following the validation stage where issues with returns remained.
- The detail in relation to the returns received (anonymised and aggregated) is also included in the report, by care home category:
 - o Standard residential care,
 - Residential care for enhanced needs,
 - Standard nursing care,
 - Nursing care for enhanced needs.

ASC Reform - Background

Peopletoo it works better with you

ASC Reforms - Objectives

- People have choice, control and support to live independent lives
- People can access outstanding quality and tailored care and support
- People find social care fair and accessible
- Supporting unpaid carers to achieve their own life goals
- Helping the adult social care workforce to feel recognised and to have opportunities to develop their careers
- For social care to be on a stable financial footing

Social Care Additional Funding

Peopletoo it works better with you

- The provisional social care financial settlement (December 2022) announcement detailed additional grant funding for social care. Most of the new funding is repurposing funding previously earmarked for social care reforms, which have been delayed for 2 years.
- The additional funding has 3 strands:
 - The Social Care Grant will increase nationally by £1.5bn in 2023-24 to £3.9bn (£612m in London). In Hammersmith & Fulham (HF) Adult Social Care (ASC) will receive £4.1m. The grant is to help meet current pressures in ASC.
 - A new ASC Market Sustainability and Improvement will be supported by a £562m ringfenced grant with £400m added to the existing £162m Market Sustainability and Fair Cost of Care Fund. In HF ASC receive £2.2m. This is to continue to support the progress local authorities and providers have already made this year on fees and cost of care exercises. The government expects this new grant funding will enable local authorities to make tangible improvements to adult social care.
 - ASC **Discharge Fund** worth £300m, will be ringfenced for adult social care and will also help support capacity and hospital discharges. In HF ASC receive £1.4m.
- Grant conditions, yet to be published by DHSC, will provide further details on the use of the 2 ringfenced grants market sustainability and improvement and discharge fund.

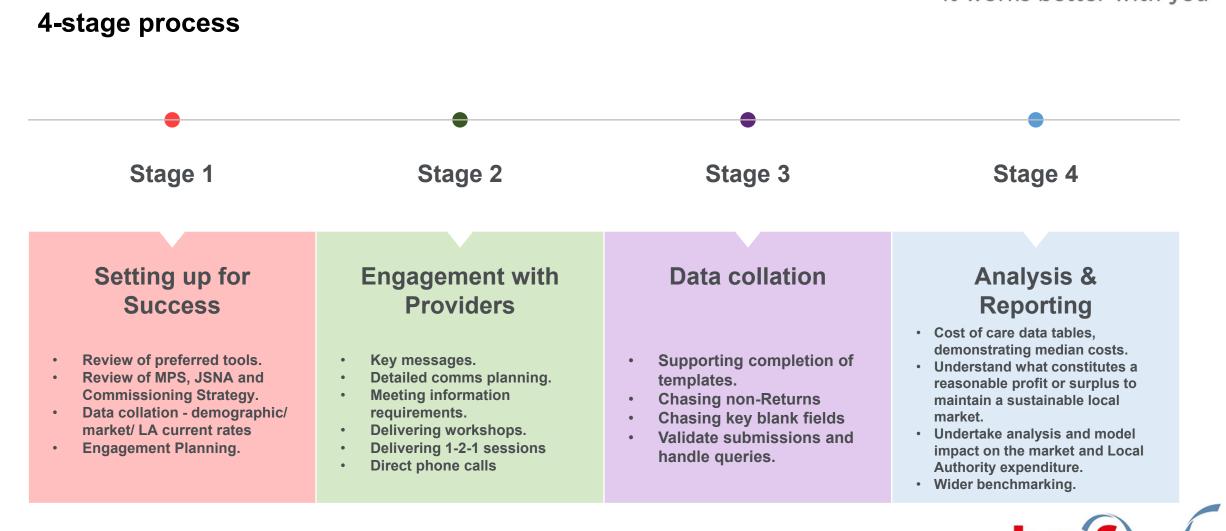

Project Methodology

Stages Tool used Data Collection Period Validation Process Treatment of Outliers

Cost of Care Exercise Stages

Peopletoo it works better with you

hammersmith & fulham

Care Home iese CareCubed Tool

- ✓ Nationally recognised tool for the exercise
- ✓ Recognised tool already in use by a third of councils & 50 providers
- ✓ Included all key fields for data collection for analysis & validation
- ✓ A tool providers/ LAs could continue to use for future exercises

Data Collection Period

Care Homes Providers

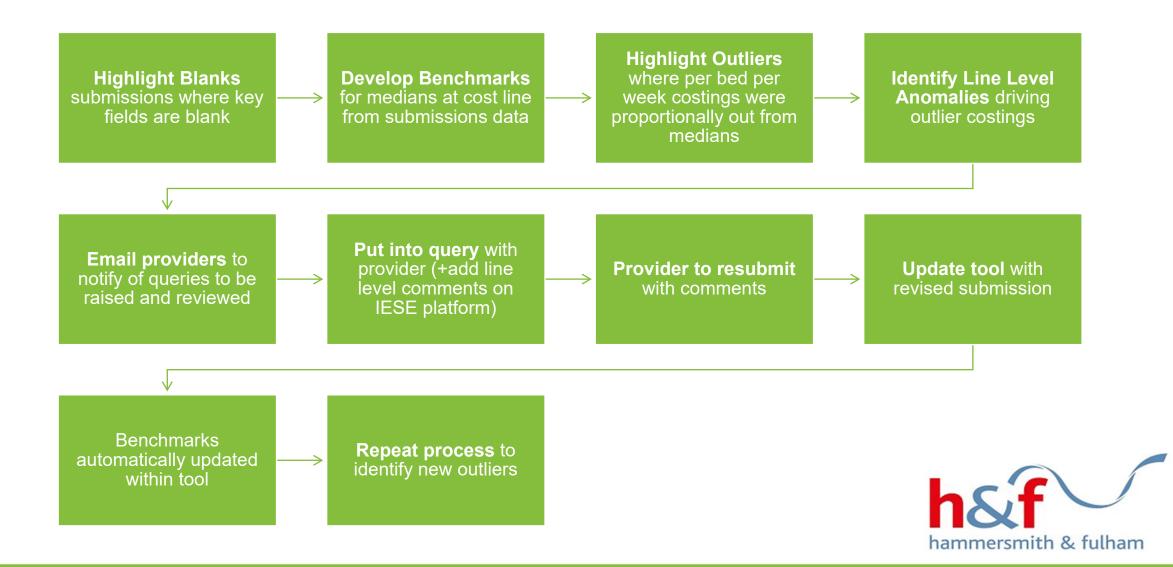

- Providers were asked to submit their costing via the iese tool by 31.07.2022
- Providers were asked to submit their April 2021 March 2022 costings and were given the option to suggest a % uplift across the lines from April 2022
- The 21-22 data has been used for analysis and an uplift will be applied to 21-22 costs to bring them up to 22-23 costs
- All of the uplift information supplied by providers has been reviewed to support the method of uplifting

Validation Process

Peopletoo

it works better with you

General comments on the methodology

Peopletoo

it works better with you

Having followed guidance, we are not confident that the cost of care figures provided here are fair or sustainable. This exercise presented significant and fundamental constraints, including issues with data quality, lack of clarity in the structure and guidance for the exercise and unreliable results being produced by the mathematical median calculation method. It provides data without the context and insight to come to an accurate judgement on the fair cost of care. This is because:

- The cost is derived from a sample of the care market that chose to provide data, so risks not being fully representative of the cost of care. This is particularly true in Hammersmith and Fulham where a small care market is a reality, and where outof-borough care home placements are very common.
- Costs can vary significantly from provider to provider, impacted by factors that include the size of the organisation, variations in staff pay rates and use of agency staff.
- Due diligence has been carried out on the data provided, however, there was insufficient time to comprehensively review cost data with providers and there is no practical way of scrutinising central overheads.
- The median calculation method produced results that do not reliably reflect market costs, particularly in Hammersmith and Fulham's context of a very small sample size submission.
- DHSC guidance did not provider clear criteria for moderation (e.g. adjusting for Return on Operations (ROO) / Return on Capical (ROC).
- DHSC guidance recommends querying outliers with providers, however there is no clear line between a cost being inefficient or an outlier. Due to the small sample size, outliers could not be identified.
- Rising inflation, living and running costs mean that the data submitted through this exercise at a point in time may no longer be accurate.

Treatment of Outliers

Given the smaller sample size of the provider submissions received, and the range of the data received, all provider submissions have been included and no exclusions were made for the calculation of the lower, median and upper quartile calculations.

These limitations are such that the results produced by this exercise cannot be treated as wholly reliable or accurate. Hammersmith and Fulham intends to work with providers from 2022/23 to agree local fee rates that are sustainable for the Hammersmith and Fulham market.

 - After Extension (providers yet to submit)

Care Home Response Rate

Peopletoo it works better with you

| Category | Total Number / % |
|--|------------------|
| Care homes in scope | 4 |
| Care home returns received | 2 |
| % Return rate out of providers in scope | 50% (2/4) |
| % of registered beds represented | 39.6% (158/399) |
| % of H&F commissioned residents represented | 54.8% (68/124) |

Reasons for non-participation:

• The remaining 2 care homes in scope confirmed they did not want to participate as they were not comfortable sharing that level of sensitive data about their organisation.

Summary of Care Home Provider Engagement

Peopletoo

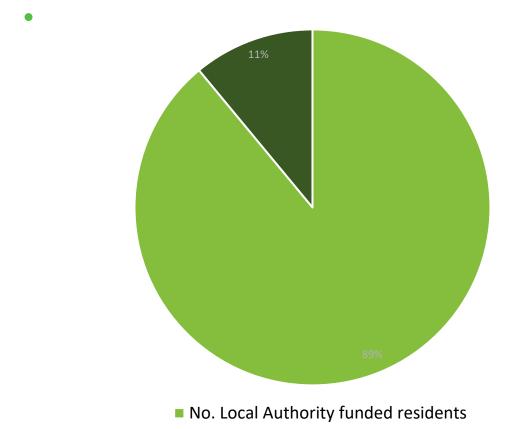

it works better with you

- Critical to the success of the Cost of Care exercise was engagement with commissioned and registered care
 providers in Hammersmith & Fulham. Peopletoo were commissioned to lead this exercise and brought with them a
 wealth of experience and skill in engaging providers from across the breadth of adult social care services, building
 relationships, and exploring difficult questions to enable and provide access to key information.
- The framing around the exercise at the outset was crucial in supporting engagement with providers, and collaboration with local commissioners was central to the development of an effective communication plan, with key messages focusing on strategic relationship-building, mutual sustainability for the future and improving outcomes together. Effective and timely communication with the provider market prior to the commencement of the exercise was critical – clearly setting out exercise goals, timescales, and information requirements, plus a named key point of contact to ensure that providers could receive continual feedback throughout the process.
- Peopletoo were supported by National and Regional engagement and support opportunities which all providers locally were supported and enabled to access to ensure a breadth of information, advice and guidance was available.
- A range of engagement and feedback tools to make participation in the exercise easy for providers were established; creating opportunities to meet collectively and individually, to discuss and explore the specific information requirements. Peopletoo ensured that an auditable process for recording provider engagement and relevant outcomes of engagement was established, which also captured those that complete the cost of care tool kit, and those who chose not to register on the iese tool.
- Peopletoo's skills and experience in provider engagement provided a high level of independence to the exercise, creating open space between providers and local commissioners which often enabled greater discussion and freer information sharing. Barriers to provider engagement included capacity and the availability of time to undertake the exercise, the inability to complete the toolkit due to the way in which accounts were collated at provider level, and the inability to split data out against the required cost lines. 2 providers chose not to participate in the exercise.

Representation of Market – Funding Type

Residents Represented in Returns by Funding Type (21/22)

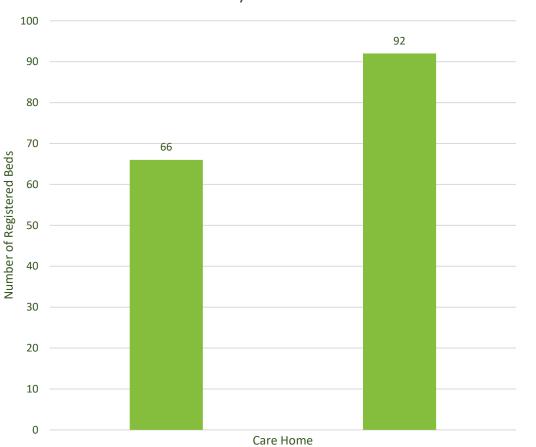

No. self funders / privately funded

• This graphs shows the returns representation across all different funding types. As this is Private Finance Initiative (PFI) the majority of placements (89%) are Local Authority funded.

Representation of Market – Size of Homes

Peopletoo it works better with you

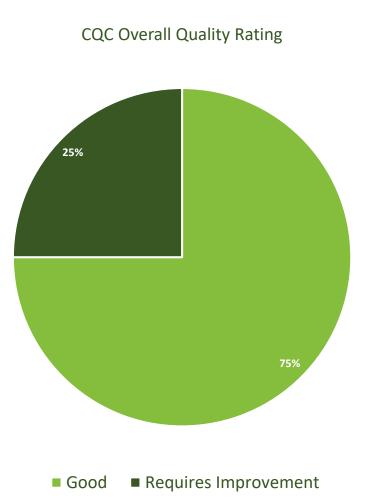

Returns by Size of Home

- This graph shows the care homes represented in the returns data by size of home.
- Overall, the returns represent providers mainly in the category of 50 to 60 Care Quality Commission (CQC) registered beds.
- Both of the homes based in H&F that chose not to participate in the exercise are larger than the homes represented in this sample.

Representation of Market – Quality

Peopletoo it works better with you

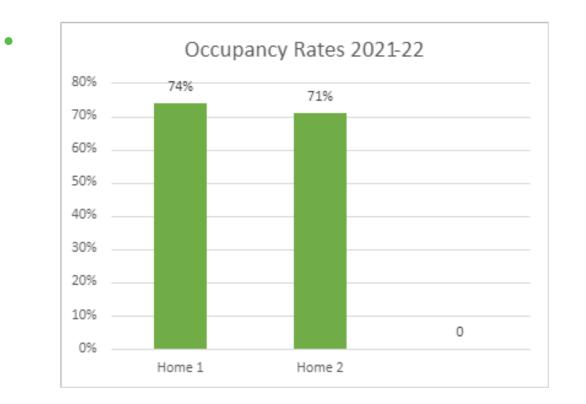

- This chart shows the last CQC Overall rating for the four homes located in Hammersmith and Fulham.
- 75% of the care homes represented in the returns sample had a CQC overall rating of "good" at the time of writing this report.
- The remaining 25% of the care homes represented were listed as "requires improvement" at the time of writing this report.
- The two care homes that submitted data were all rated as "good" at the time of writing this report.

Representation of Market – Occupancy Levels

Peopletoo

it works better with you

- This bar chart shows the occupancy rate applied to the 21-22 provider cost submissions.
- 2021/22 occupancy level were lower than usual / national benchmarks due to the homes being closed to admissions to manage Covid outbreaks
- 2022/23 occupancy level is 100%
- When looking at occupancy from total number of CQC registered beds, the occupancy is at a lower rate than would be expected from national benchmarks
 - This could be remodeled to see how costs would change at a 90-95% occupancy rate

Outcome of Cost of Care Exercise – **Care Homes** Challenges in the Data Approach for Calculating Median Approach to Inflation Approach to ROO & ROC Annex A Table Summary of Annex A

Challenges in the Data

Peopletoo

it works better with you

The Fair Cost of Care Exercise set out by the DHSC is one which is predominantly driven by the input of provider cost data, and as the exercise only sets loose guidance around validation parameters and the ability of local commissioners to challenge and interrogate the data in depth, several challenges in relation to data accuracy should be raised and noted.

Specially for Hammersmith & Fulham, these challenges include:

Accuracy of data provided

Although validation has allowed for some interrogation of costs, it is not possible to completely verify that these
costs are truly reflective of incurred costings.

Sample Size

• Due to the small number of care homes in borough, the sample size of the data collected is very small.

The impact of Covid-19

 The requirement to base a fair costing exercise on a year in which care homes and commissioners faced significant pressures in relation to occupancy and costs as a result of the Covid-19 pandemic is a challenge raised at a National level.

The inability to re-calculate higher occupancy and lower ROO/ROC

 In setting a fair cost of care locally, commissioners would like to be able to model several scenarios such as higher occupancy and lower Return on Operations and Return on Capital figures to better reflect an accurate local position. At the time of writing this report, there is limited availability in the toolkit to undertaken this modelling. This is a challenge highlighted at a National level, with other commissioners wishing to undertake similar modelling activity.

Approach to Calculating the Median

The are a number of methods that can be used to calculate the median values for this CoC exercise.

- 1. Medians calculated using end per resident per week costings from each submission
- 2. Medians calculated at category subtotal level then summed
- 3. Medians calculated at line level, summed at subtotals, then subtotals summed

The calculation method used for Annex A is option 3 after taking advice from the DHSC.

The median calculation is more suitable for large data sets, whereas for small sample sizes the addition or removal of a single value can significantly impact the median. This is particularly an issue to be considered within the Hammersmith and Fulham context. In addition, the homes that submitted data are under a PFI contract and therefore a median does not reflect actual costs.

Approach to Inflation of 21-22 Costs

- The data collected in the IESE tool asks providers to submit their 21-22 costs with an option to apply an uplift to bring those costs in line with April 22 costings.
- Hammersmith & Fulham have reviewed a number of inflationary methods to move providers actual 21-22 costs to April 22 costs. They have decided that the best method would be to apply an overall uplift of 3.5% in line with current PFI contractual arrangements.

| Category of Bed | Uplift applied |
|--|----------------|
| Care Home occupied beds without nursing: Final total | N/A |
| Care Home occupied beds without nursing with dementia: Final total | N/A |
| Care Home occupied beds with nursing: Final total | 3.5% |
| Care Home occupied beds with nursing, dementia: Final total | 3.5% |

Note: Any assumptions made for this exercise need to be caveated as nationally there is uncertainty around inflation and cost of goods and services. This means that predicting future inflation is very difficult and needs to be reviewed in line with the council's policy to uplifts.

Applying Proposed Approach to Inflation Method of 21-22 Costs

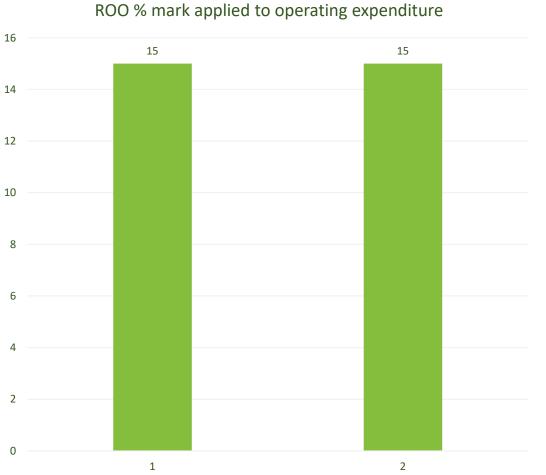

it works better with you

| Bed Type | Current Medians (21-22 Data) | 22-23 Medians (Calculated using agreed approach for inflation |
|--|------------------------------|---|
| Care Home occupied beds without nursing: Final total | N/A | N/A |
| Care Home occupied beds without nursing with dementia: Final total | N/A | N/A |
| Care Home occupied beds with nursing: Final total *includes FNC | £ 1,339.11 | £ 1,385.97 |
| Care Home occupied beds with nursing, dementia: Final total * includes FNC | £ 1,339.11 | £ 1,385.97 |

- Hammersmith & Fulham did not receive any submissions of care homes who have beds without nursing (ie. residential) and therefore is unable to provide data. See also Annex A, Part 2.
- Hammersmith & Fulham is currently unable to separate costings for care home beds with nursing with or without dementia and therefore the median value is the same.

Approach to ROO

Peopletoo

it works better with you

- This graph shows the ROO % listed by providers as part of this exercise. They were also given the option to submit this a cost as a value per annum.
- Overall, when looking at all submissions used to calculate Annex A, the ROO per resident per week came out between 12-17% of the overall per bed per week cost.
- H&F have reviewed submissions and guidance around benchmarks available and believe an ROO of 5% is fair to enable sustainability in the market for current and future provision.
- This would differ from the costings listed in Annex A and would need to be modelled separately.

Approach to ROC and future inflation

Peopletoo it works better with you

 The care homes that have chosen to participate in this exercise currently operate under a PFI model and ROC would not be applicable. H&F would consider a 5% ROC for non PFI provision.

- Future inflation uplift are determined by a number of factors
 - Wider societal inflation
 - Budget affordability
 - Contract
 - Demand and Capacity
 - Quality of service benchmarked across North West London
- Each year, an uplift group recommends an approach to the senior leadership team, which decides on the final outcome. This outcome is then communicated to care homes. Any challenges to this outcome are looked at individually.

Note: Freehold valuation per bed was not provided in the submission received

Potential Impact of Annex A CoC Figures

Peopletoo

it works better with you

| Bed Type | H&F Current Average Paid Rates | CoC 22-23 Medians (Calculated using agreed approach for inflation) | Potential Gap |
|--|-----------------------------------|---|---------------|
| Care Home occupied beds without nursing: Final total | N/A | N/A | N/A |
| Care Home occupied beds without nursing with dementia: Final total | N/A | N/A | N/A |
| Care Home occupied beds with nursing: Final total *includes FNC | £1004 | £ 1,385.97 | £381.97 |
| Care Home occupied beds with nursing, dementia: Final total * includes FNC | £1004 | £ 1,385.97 | £381.97 |

Averages calculated using data provided based on 65+ placements. Both submissions are nursing care homes only. Residential care home medians could not be calculated through the CoC exercise.

Overall conclusion and caveats

- Only two care homes submitted data. These two care homes are of the same group and operate under a PFI contractual arrangement. These homes have placements with nursing support.
- Two other care homes choose not to submit data and therefore no data was received that reflected placements without nursing support.
- Due to PFI contractual arrangements, (1) the median does not reflect actual costs and (2) a ROC value cannot be provided as the assets belong to H&F Council.
- H&F Council were informed that the return of the care home group reflected a national return for all care homes in the group and therefore it did not reflect a London Living Wage for care workers, which is stipulated by H&F Council.
- H&F Council is an exporter of residents (mainly to North West London) and their costs of care will impact on H&F Council disproportionately.
- Therefore, the Cost of Care result cannot be taken as a reliable representation of cost of care within H&F Council.

Overall conclusion and caveats

- The data quality concerns are such that, even after final analysis, it is necessary for Hammersmith and Fulham to consider other factors in setting fee rates as the Cost of Care outputs alone do not provide a reliable basis for fee setting.
- The outputs of this exercise will be one element to inform future negotiations, taking into consideration other known market factors including inflation, demand, capacity, benchmarking, quality and importantly affordability for Hammersmith and Fulham and availability of funding.
