

Controlled Parking Account

There are currently 42,783 shared use parking bays in Hammersmith and Fulham, available for parking permit holders and pay and display users. In addition, there are 59 pay and display only bays, 105 bays for permit holders only and 23 motorcycle bays.

Under section 55 of the Road Traffic Regulation Act 1984 (as amended by the Traffic Management Act 2004) there is a requirement that any surplus made from parking activities must be spent only on the following purposes:

- highways improvement schemes
- highway maintenance
- public passenger transport services
- environmental improvement in the local authority's area

Therefore each year the Council produces a financial statement setting out parking receipts, the cost of operating parking, and the use of the resulting surplus.

Parking income and expenditure

Income from the on-street operation in 2013/14 totalled £34.7 million, and the expenditure to provide the on-street service was £12 million. The surplus of £22.7 million was used mostly to fund parking, public transport and other transport related improvements.

Although the level of permit and pay and display charges are set by the Council, the level of penalty charge notices and removal fees are set by London Councils' TEC.

Application of surplus

The Council has discretion on how to spend any surplus that may arise, within the allowable uses set by Section 55 of the Road Traffic Regulation Act 1984.

Parking Account 2013-14	£
On Street Parking Charges	(12,283,587)
Parking Bay Suspension Charges	(2,091,553)
